

SOCIAL SECURITY

DON'T BELIEVE THE HYPE!

If you don't care about the future of Social Security because you don't think it will be there for you, then you are letting the government off the hook. Social Security is the most successful government program in U.S. history, and has never missed a payment. Before Social Security, up to 50% of elderly people lived in poverty. Today, that number has dropped to 10%. Since money is being taken out of your check to go into the SS program, make sure you can get your money out when you need it!
