

The U.S. Hegemonic Project,
the Middle East, and
The Future of Iran
Dr. Younes Parsa Benab

Professor of Political Science, Strayer University
Editor - *Iran Bulletin, Review of Iranian Political Economy and History*

History teaches us that outside intervention always weakens internal pro-democracy movements. Learn why the US attack plans will only strengthen the dictatorial clerical regime in Iran.

When the U.S. denounces the Islamic Republic of Iran's reactionary regime, why don't progressive movements within Iran support U.S. intervention?

Who is in favor of intervention, and why? What will happen if the U.S. tries to expand its program of "democratic" occupation across the Middle East?

Dr. Parsa Benab will discuss the geo-strategic importance and future of *Iran* and how the characteristics and nature of the resistance there compares to the resistance in Iraq and Palestine.
